

Overview

I'm M. Edriss Aria, an experienced web designer and developer with expertise in both front-end and back-end development. I specialize in creating visually appealing and user-friendly websites using technologies like React, Svelte, Adonis, and Laravel. I excel at building responsive interfaces, designing efficient APIs, and working with MySQL databases. I worked as a backend developer at Hamyarsystem, delivering high-quality web applications and staying updated with the latest web development trends. I'm eager to contribute my skills to challenging projects and exceed client expectations.

Experience

here is some of my projects

- **UBuilder Content Management System**

This is an innovative content management system built using Svelte and Node.js. One of its standout features is its intuitive drag and drop functionality, allowing users to easily create and manage their website's content.

- **Sportcar online store**

This project was a significant undertaking that I had the privilege of working on with the talented Hamyarsystem team. In this project, my role primarily focused on backend development. Collaborating closely with the team, we successfully delivered a robust and scalable solution.
